Summer/Fall 2024

Baraboo, Wisconsin

2024, The Year of J.I. Case !

61st Annual Show August 16,17,18, 2024

We only have one feature this year, and it's going to be a big one ! This year's Case feature is shaping up quite nicely. The feature committee has been working with the J. I. Case Heritage Foundation who is having their 38th Case Exposition at our show. Exhibitors from across the state and country will have many rare and unique pieces on display and live demonstrations. Some items to be sure and check out include the 30-60 hp oil tractor, Case automobiles, and two rare steam engines that will be on display in the feature building. Several operating steam engines that are not regularly at the show will be hauled in for this event as well.

Prairie tractors, cross motors, letter series, hundred/30/70/90 and 94 series as well as implements from all generations will be covering the acreage around the feature building. Garden tractors, models and memorabilia are planned to be on display.

Case equipment of any type or condition is welcome to take part in the feature display. Tractors and implements from brands that were bought by Case such as Osborne, Grand Detour, Reeves, Peerless, Emerson-Brantingham, Rock Island and David Brown are wanted for exhibition. If you are planning to bring something for the Case feature or have questions or comments, please contact a feature committee member. By David Fuller
Case Committee: Peter Holzman-608-635-7772, Tanner Brethorst-608-669-2739, David Fuller-608-592-3713

Jacobson Family from Wisconsin's 1925 Case Touring Car

AED-automated external defibrillator

During the show the AED's will be located in the Sawmill #34 and Stationary Steam Engine Shed #9.

After the show one will be in the Maintenance Building #25 and Engine Shed #9.

From the Policy and Procedures Committee

A day of fun wristband is \$10 per person with kids 12 and under free. (No wristband required) A weekend wristband is \$20. We have 3 gates for admission : Vendor Gate (North), Main Gate and Cart Gate by Moline Building. Personal Transportation Vehicles (PTV) can only enter and register at the Cart Gate. Exhibitor Gate (South) is for Campers, Exhibitors, Volunteers, and Food Service Workers. Exhibitors will get 2 weekend wristbands and purchase wristbands for the others in their group. S&G Members and Exhibitors will fill out a card and return to the office for their packet. **A preregistration form has now been added to (<https://badgersteamandgas.com/>)** Food Service and Volunteers only get a wristband from their area coordinator and many enter at any gate. Persons 65 years of age and older with a membership card will get a free wristband. On Sunday, August 18th, **Military** will receive a free wristband with proof. Thank you for your service !

Club Volunteers

As with many organizations your volunteering is paramount for the success of the club. To know where you can help come to meetings and talk with an Area Coordinator in an area of your interest. There is a sign up board for you to provide information to help coordinate your volunteering. Thanks for making our club great.

Area Coordinators

This group has Volunteer sign up sheets and will be getting your weekend wristbands to you. Additional sheets are available online, at meetings and in the mailbox outside the office. (Link to volunteer signup sheet) <https://sites.google.com/view/bsnhec>

Personal Equipment

An inventory of equipment stored on the grounds is being done. We are selling duplicate items at next spring's auction. All personal equipment stored is limited to active members only. The board will receive storage requests, and if granted the owner completes a registration form and obtains a tag. The filled out tag is attached to the front of the item. You are responsible for insuring your item. If the board denies storage, you will need to remove the item soon after. Registration occurs at meetings or in the office during the show.

Things have changed drastically for the upcoming show, so if you have questions about any of these topics, gate procedures, wristbands or equipment stored contact the Policy and Procedures Committee.

August 16th -18th- 61st Show- J.I. Case Heritage Foundation

Sunday August 18th-**Military** free admission with proof. **Thank you for your service !**

Monday August 19th-show clean up

Pre-show Help: Saturday August 10th, mowing, moving machinery, cleaning buildings and restrooms, setting up and wiping chairs, benches and tables, plus more

Golf Cart Rental-contact Barb Meister 608-477-3589

People Hauler Drivers & Spotters-contact Dale Goff 608-381-0249

Threshing & Baling-contact Neal Stone 608-963-5776

Garbage Detail-contact Doug Johnson 608-576-0064 or Jim McGhee 608-574-4607

Women's Building

Displays this year will include Wisconsin Butter, Baskets, Vintage Kitchen, and American Girl Doll's 35th Anniversary. Returning this year will be the Sauk County Historical Society, Reedsburg Log Village and the WI Dells Historical Society. We hope to have our new two harness loom up and running. Other volunteers will be showing crafts of the past as always. Help is needed for building clean up and set up !! Contact Jan Bruski 414-617-9402. Thanks.

Youth Steam Engine Project

This is a free activity for boys and girls ages 11-15 on Friday August 16th and Saturday August 17th at 1:00pm in the Machine Shop Building #14. Participants build a working model steam engine which they can keep. They will also get an exhibitor packet in the office. There will be space set aside for them to run the engine in Model Building #8. This is for **FIRST TIMERS ONLY** ! Contact Elizabeth Johnson-Dickson at 407-947-2579 to register before the show or in Building #14 9:00am-1:00pm. (12 per class)

Kids Pedal Pull-Sunday August 18th-registration at 10:30am and pulling at 11:00am by the bleachers

2024 Case Show Buckle-Pick up orders or buy one in the Arts/Crafts Building #19.

Field Trip April 4th

Sixteen club members attended a talk by Matt Maroon, CEO of C-Motive Technologies to learn about electro-static motors. Over the last decade this Madison-based company has expanded Ben Franklin's ideas and created 1/2HP plus motors with drive voltages of 3 phase, 900 volts, and a proprietary dielectric fluid moving printed charged plates. These motors use less resources and are 35% more efficient because they are far easier to fabricate than coils and ironware motors, and high voltage means low current, low heat ! Just as an electrostatic ally charged balloon sticks to a wall, these motors can hold a loaded position with virtually no energy losses (0.2% full power) making their application to robotics an exciting opportunity. Thank you Sally Leong for organizing the trip.

Volunteer Job ! Newsletter editor starting 2025 as this is Crystal's last writing.

Newsletter is published twice a year in February and August to our website at www.badgersteamandgas.com
